

MOHAMED FAZLEE

MOHAMED SEEM MOHAMED FAZLEE

PROFILE

I usually consider myself a forward thinker and a mover; I am a strategic thinker and a problem solver. These traits were specially reflected through my activities and progress in sports. Being able to lead the Football and Athletics, support the perfect board, train students for leadership and team building and organize several events and programmes has helped me improve my skills. I have nurtured the skills of building teams and respecting all members alike while making sure to execute the projects handed over to me just like getting the ball to the goal or to the basket.

My love for networking and IT developed when I noticed that I had substantial interest when the spark took over when I was at class. I look forward to creating sustainable and impactful change in the most beautiful of forms. I spend my time trekking and hiking.
